SLCM establishes 31 Krishi Quality Janch Kendras to revolutionize food grain quality checks in [India](#)

Sohan Lal Commodity Management (SLCM) Group, India's premier one-stop post-harvest Agri logistics player and warehouse service provider, has marked a significant stride in the Indian agricultural landscape. They have introduced a groundbreaking initiative with the inauguration of the physical 'Krishi Quality Janch Kendra,' an AI and ML-powered solution poised to revolutionize food grain quality checks in India.

**This innovative solution is designed to benefit farmers, traders, FPOs, and corporate entities involved in the quality check of food grains.**

### **31 Krishi Quality Janch Kendras Across Delhi & MP**

In the inaugural phase, 31 centres have been established across Delhi and Madhya Pradesh, making a remarkable impact on the agricultural ecosystem in India. Notably, considering that only a few hundred food grain testing centres have been established in the country since independence, these 31 centres stand as a defining leap towards enhancing the quality assessment process.

### **Objective to Establish Additional 600 Centres by Feb 2024**

SLCM is set to expand its transformative 'Krishi Quality Janch Kendra' initiative, aiming to establish an additional 600 centres nationwide by the end of February 2024. This extension builds on SLCM's flagship Agri Reach QC module, an AI ML-driven application, featuring the first-ever NABL-accredited [food grain](#) QC mobile app. This extensive expansion will cover the length and breadth of the country, ensuring that the agricultural community from diverse areas can easily access and benefit from these quality-check facilities.
